

Physiotherapy Assessment Service

You can now book a direct appointment with a Physiotherapist for a number of muscle, bone and joint problems, without having to see your GP first.

These are short 15 minute appointments in which you will be assessed and advised for the problem you have. These appointments do not result in long treatment sessions or further appointments for treatment, but if the Physiotherapist thinks a course of treatment is required you will be referred to the Physiotherapy Service.

What can Physiotherapists do for you?

The Physiotherapist will assess joint pains, strains and other injuries such as:

- Back pain
- Neck pain
- Pain in the elbow, wrist or hand
- Shoulder pain
- Pain in the hip, knee or ankle

If you are feeling **generally unwell, have chest or abdominal pain**; please book an appointment with your GP.

This service is not available for children under the age 16
